Dear Mrs Smith

Please join the UK's leading experts on chronic oedema and share in their knowledge, skill and enthusiasm. With new products and techniques revolutionising the care you can provide, patients need no longer hear the news that nothing can be done.

The sessions are relevant to your practice, with the agenda focusing on the accurate assessment and diagnosis of chronic oedema through to acute and long term management. Speakers will discuss various diagnostic and treatment techniques including pulse oximetry and Doppler ultrasound. A session on full leg bandaging completes the day.

To accept your invitation, please fill out the enclosed card stating the date and study day you are able to attend.

We look forward to seeing you there.

Yours sincerely
on behalf of Activa Healthcare Ltd.

Agenda

Morning session	Session outline	Author
Chronic oedema: an overview of the problem and its implications for the patient and society.	In this session the speaker will provide an overview of the underlying pathologies responsible for the development of chronic oedema and the impact this condition has on the patient, their family and the health service.	Professor Christine Moffat
Assessment and diagnosis of chronic oedema.	This session will lead the delegates through the accurate assessment and diagnosis of chronic oedema, including differential diagnosis.	Rebecca Billingham
Effective acute and long-term management of chronic oedema.	This speaker will advise the delegates as to the principles relating to both acute and long-term management of chronic oedema using case reports to reinforce the session.	Anne Clements

Afternoon session

Use of Doppler and pulse oximetry assessments in the management of chronic oedema.	In this session the delegates will be introduced to various techniques including Doppler and pulse oximetry which facilitate the assessment of arterial circulation in the patient with chronic oedema.	Janice Bianchi and John Timmons
Management of the skin and wounds in the patient with chronic oedema.	This speaker will provide a presentation supported by case reports which outline the principles of skin and wound management in the patient with chronic oedema.	Jackie Stephen-Haynes
Full leg bandaging.	This session will be a practical session which will offer delegates the opportunity to watch the application of full leg bandaging.	Kimby Osborne and Jeanette Muldoon
